

## Map of Volcanoes of the Trans-Mexican Volcanic Belt

This map illustrates the group of volcanoes (part of the Trans-Mexican volcanic belt) surrounding Mexico's Plateau of Anahuac, located between the Pacific Ocean and Gulf of Mexico, along the Ring of Fire. The volcanoes are: (1) Ceboruco (a dacitic stratovolcano); (2) Cofre de Perote (an extinct volcano, originally called Naupa-Tecutépetl); (3) Volcán de Colima (also called Volcán de Fuego);

(4) Iztaccihuatl (dormant and 5,230 meters high); (5) El Jorullo (a cinder cone volcano); (6) La Bufa de Mascota (Bufa de Real Alto); (7) Pico de Orizaba (a stratovolcano, also called Citlaltépetl); (8) Patamban; (9) Popocatepetl; (10) Tancitaro; (11) Toluca; (12) Tuxtla; and (13) Uruapan. Also visible on this map is Lake Chapala and the numerous rivers in this region.

1. Color Lake Chapala blue.
2. Trace each river in blue.
3. Color the Pacific Ocean and Gulf of Mexico green.

4. Color the Plateau of Anahuac orange.
5. Which volcano is also known as Citlaltépetl?
  - a. Ceboruco
  - b. Naupa-Tecutépetl
  - c. Patamban
  - d. Pico de Orizaba
